

1.3: Curriculum Enrichment

1.3.1: *Institution integrates crosscutting issues relevant to Professional Ethics, Gender, Human Values, Environment and Sustainability in transacting the Curriculum*

The curriculum endorsed by the Guru Govind Singh Indraprastha University is thoughtfully designed to address critical concerns related to Professional Ethics, Gender, Human Values, Environment, and Sustainability. It goes beyond the traditional academic subjects and incorporates these essential elements to foster awareness and sensitivity among students. This approach aims to nurture students into conscientious and socially aware citizens who are not only academically adept but also attuned to the pressing issues facing our society and the environment. In essence, the curriculum seeks to ensure that students grow into individuals who are both sensitive to these concerns and capable of making meaningful contributions to the betterment of our country. Furthermore, we take an active role in promoting gender sensitization by hosting a variety of events throughout the year. These include seminars, conferences, guest lectures, exhibitions, street plays, and literary activities, all of which contribute to a deeper understanding of gender-related issues.

Regarding Environment and Sustainability, our institution embraces a community-oriented work culture that aligns with the Sigma-Six Q sustainable way of life. This approach encompasses a wide spectrum of practices, including the integration of water and air quality management, education, healthcare, sustainable agriculture and dairy practices, innovation, and the promotion of human values.
