

3.2.1: Institution has created an ecosystem for innovations, Indian Knowledge System (IKS), including awareness about IPR, establishment of IPR cell, Incubation centre and other initiatives for the creation and transfer of knowledge/technology and the outcomes of the same are evident.

1.Ecosystem for Innovations

MERI provides a conducive environment for research and technology driven innovations. The key constituents of the ecosystem for Annual Quality Assurance Report of MERI innovations are Technology, Research, Innovation and Industry. One of Patent by Ms. Simmi Madaan (Assistant Professor) mentioned that each one of the above acts as a feeder to the next and creates a ripple effect on building innovative products. Artificial intelligence (AI)-based behavior recognition techniques can help evaluate students' attention and engagement during classroom sessions. With rapid digitalization, the global education system is adapting and exploring emerging technological innovations, such as AI, the Internet of Things, and big data analytics, to improve education systems.

2. Establishment of IPR cell and Incubation centre and other initiatives for the creation and transfer of knowledge/technology

The institute has also planned to boost the entrepreneurship culture among the students. Keeping this in view, the college launched its start-up hub named, MERI Start-up Hub headed by Dr. Anjali Nigam. The overall objective of the MERI Startup Hub at MERI College is to establish the practical application of knowledge to facilitate entrepreneurship. By allowing potential students to get the chance to submit their creative ideas through competitions and brainstorming, and also examining original and creative ideas or concepts

put forth by students, researchers, and faculty members from a range of societal and commercial sectors. Students are supplied with resources to design prototypes beneficial for promoting agriculture and rural development, which is also the one of goals of the incubation center. It also serves as a platform for students to transform their ideas into technological innovations. A beginning was made to develop our students and convert inventions into a crucial driver for economic progress, and ideas and innovations, which flow gradually with the start-ups. The major startups started by the students are Carpool, De Zaina (e-aggregator for Budding Fashion), baniyababa.com, and Yourstartup 9 etc. Students are encouraged to gain hands-on experience and better Industrial Exposure.

Post launch, the department has organized number of activities and programmes including 'Corporate startup connect Forum 3.0 on 5th May 22, 'Entrepreneurship & Innovation Growth

Fest 1.0' on startup India Day 16th January 22, and, 'Women entrepreneurs & Innovation Growth Fest 2.0' on 8th March 22, 'Creativity & Innovation workshop series 4.0' in May 22. It aims to provide necessary facilities for start-ups, such as mentoring, fund-raising, and technological support. Every member is nurtured by industry experts, management, and faculty. The MERI Start-up cell is eager to conduct a variety of seminars, speaker sessions, creative competitions, and games for prospective entrepreneurs and to help them by offering the tools they need, including funding, mentorship, consulting, and networking. This centre acts as a complete support system that provides hands-on experience in innovation and entrepreneurship. Every member is nurtured with the industry experts, management, and faculty.

The poster features a central graphic of three overlapping circles labeled 'Patent', 'Trademark', and 'Copyright'. To the right, the text reads 'Workshop on Intellectual Property Rights Awareness'. Below this, the date '23 March 2023' and time '11 am to 12 pm' are listed, along with the location 'Seminar Hall, 4th Floor, MERI College, New Delhi'. Logos for MERI College, StartupHub, Institution Innovation Council, NIPAN, and Intellectual Property India are also present. At the bottom, a link to join online is provided: <https://us06web.zoom.us/j/82978555101?pwd=Ukt4M2R3a2crdThvMkM1eGtqRkFpSQTD9>. The footer contains accreditation information and contact details for MERI College.

3. **Research Club** was established in the institute. This year the institute was able to publish 8 research papers in Scopus, 3 patents and 5 papers in UGC care. Beyond that 10 faculty members are certified as innovation ambassadors / trainers for entrepreneurship by IIC and 6 faculty members are certified as trainers for UHV (universal Human Values) FDP by AICTE. The placement record has improved from last year. The Incubation center MERI startup hub was successful in enrolling 10 incubatees from varied domains.

College has also taken initiative steps towards developing ecosystem for innovations and knowledge sharing methods.

1. The faculty members are empowered to take up research activities utilizing the inherent skills.
2. The Research and Development Cell of our institution motivates the student and faculty members.
3. Start-up hub helps students to take their new and innovative ideas forward.
4. Faculty members extend scopes to explore their new ideas in the field of research and development.
5. It also helps to create research culture among faculty members and students. The students and faculty are availing the facilities within the campus to carry out their research activities such as; Wi-Fi throughout the campus, Internet facility of 35 Mbps is available to students and staff.
6. Computing facility is available and adequate licensed software's are also available. Well-furnished Seminar/Auditorium halls with a seating capacity of over 200-500 audience are available to conduct seminar/workshop, guest lectures, and discussion on technical paper/project presentations, cultural and screening of informative educational movies.

The Research club of MERI fosters a spirit of research and innovation among students as well as faculties. The club conducted activities as workshops of various types of tools and techniques used in contemporary research and innovation. The students and faculty are encouraged to work on research papers and innovative technology development in a collaborative manner. The environment of research and innovation is also fostered by promoting hands-on experience with various types of research software and guiding the young researchers with the knowledge of implementing them as per various types of research studies.

PLACEMENT NOTICE MCA 2021 BATCH

KNOLDUS INCORPORATIONS is doing WEBINAR for MCA 2021 batch students.

ABOUT COMPANY: Knoldus is a niche software development company focused on functional languages like Scala, Java 8, Clojure and Erlang and Big Data solutions like Spark and Hadoop. Knoldus is the only Light bend (Type safe) partner in the Asia-Pacific region and is one of the biggest promoters of Scala Eco System. Knoldus is the Data bricks (Creator of Spark) Certified Systems Integrator as well. For more information logon to <https://www.knoldus.com>.

A common data engineering pipeline architecture uses tables that correspond to different quality levels, progressively adding structure to the data: data ingestion ("Bronze" tables), transformation/feature engineering ("Silver" tables), and machine learning training or prediction ("Gold" tables). Combined, we refer to these tables as a "multi-hop" architecture. It allows data engineers to build a pipeline that begins with raw data as a "single source of truth" from which everything flows. In this webinar, Kundan Kumar will show how to build a scalable data engineering data pipeline using Delta Lake. Delta Lake is an open-source storage layer that brings reliability to data lakes. Delta Lake offers ACID transactions, scalable metadata handling, and unifies streaming and batch data processing. It runs on top of your existing data lake and is fully compatible with Apache Spark APIs.

Title: Building reliable data platform with Spark and Delta lake

Date: Thursday, 26 November 2020

Notice for MCA 3RD year students.

TCS Inframind season IV (Engineering Innovation Contest)

We have opened the registration of our Contest Inframind for students passing out in 2021, 2022 and 2023. Other than exciting prizes there are Internship opportunities for Batch. 2022, 2023 and chances of getting Pre placement offers through this contest for the students of batch 2021.

Students will get the opportunity to learn and test their skills in the trending technologies namely Cloud, Devops, Artificial Intelligence, Machine Learning, Automation, Networking.

Depending upon the performance in the interview process, Ninja (3.36 LPA for UG and 3.53 LPA for PG) or Digital (7.0 LPA for UG and 7.30 LPA for PG) Package will be offered to the students.

There is an exemption from the eligibility criteria (above 60 percent in class 10th, 12th, graduation and post-graduation (if applicable)) i.e. students with less than 60 percent in academics, having backlogs and gap of more than 2 years in the education can also apply.

Extended Education in the highest qualification is not allowed. Students should be completing highest qualification within the stipulated duration mentioned by the College/University. We would like to request you to circulate this information to all Engineering (B.Tech/M.Tech/MCA) and Science Background (B.Sc/BCA/M.Sc) Students with any specialization so that they can take benefit of this opportunity. The details are shared below.

Following are the Tentative dates for different rounds :

Round 1 - 18th December, 2020 (MCQ based)

Round 2 - 24th December 2020 to 1st February 2021 (Prototype submission & Video presentation)

Round 3 & Grand Finale - To be Finalized

PLACEMENT NOTICE FOR MCA2021 STUDENTS

TATA CONSULTANCY SERVICES is doing webinar for MERI MCA2021 students of batch as per details given below.

ABOUT COMPANY: **TATA CONSULTANCY SERVICES LIMITED (TCS)** is Indian Multinational Information & technology (IT) services, consulting Company Headquarterd in Mumbai. TCS Limited was founded in 1968 by division of Tata Sons ltd Its early contracts included punched card services to sister company TISCO (now Tata Steel), working on an Inter-Branch Reconciliation System for the Central Bank of India, and providing bureau services to Unit Trust of India. In 1975, TCS delivered an electronic depository and trading system called SECOM for the Swiss company SIS Segal Inter Settle (deutsch); it also developed System X for the Canadian Depository System and automated the Johannesburg Stock Exchange. It associated with a Swiss partner, TKS Teknosoft, which it later acquired. It is a subsidiary of the Tata Group and operates in 46 countries. TCS is one of the largest Indian companies by market capitalization. TCS is now placed among the most valuable IT services brands worldwide. TCS alone generates 70% dividends of its parent company, Tata Sons. The parent group recently decided to sell stocks of TCS worth \$1.25 billion in a bulk deal. In 2015, TCS is ranked 64th overall in the Forbes World's Most Innovative Companies ranking, making it both the highest-ranked IT services company and the top Indian company. It is the world's 2nd largest IT services provider. As of 2017, it is ranked 10th on the Fortune India 500 list. In April 2018, TCS became the first Indian IT company to breach \$100 billion market capitalization, and second Indian company ever (after Reliance Industries achieved it in 2007) after its m-cap stood at Rs 6,79,332.81 crore (\$102.6 billion) in Bombay Stock Exchange. For more details logon to www.tcs.com

At the current situation of crisis, hope you, your family and entire student fraternity is safe at home.

TCS has arranged an interactive webinar session to discuss on **HackQuest**.

The session will be addressed by Cyber Security Experts.

Whether you're Google's search engine, serving a billion active monthly users who interact with your service for free, or Salesforce, with 3.75 million paying subscribers, building a technology product means serving people. And in today's world, people's expectations—for free and paid services alike—are high. Speed. Uptime. Useful UX. Today's user base expects everything to meet a high standard.

Which is why it's important for companies to understand and maintain SLAs, SLOs, and SLIs—three initialisms that represent the promises we make to our users, the internal objectives that help us keep those promises, and the trackable measurements that tell us how we're doing. Join our upcoming webinar with Site Reliability Engineering experts to understand what SLI, SLO, and SLA are and how they contribute to your reliability goals.

PLACEMENT MCA NOTICE

17/10/2020

PLACEMENT NOTICE MCA 2021 BATCH

KNOLDUS INCORPORATIONS is doing WEBINAR for MCA 2021 batch students.

ABOUT COMPANY: Knoldus is a niche software development company focused on modern languages like Scala, Java 8, Clojure and Erlang and Big Data solutions like Spark and Hadoop. Knoldus is the only Light bend (Type safe) partner in the Asia-Pacific region and one of the biggest promoters of Scala Eco System. Knoldus is the Data bricks (Creator of Hadoop certified Systems) Integrator as well. For more information logon to <http://www.knoldus.com>.

While ML applications are becoming popular in our industry, however the process for building, deploying, and continuously improving them is more complex compared to more traditional software, such as a web service or a mobile application. They are subject to many complexities: the code itself, the model, and the data. Their behaviour is often hard to understand and to predict, and they are harder to test, harder to explain, and harder to debug. CD4ML (Continuous Delivery for Machine Learning) is the discipline of bringing DevOps principles and practices to Machine Learning applications. We will be joined by Shubham Goyal who will explain how to automate the end-to-end lifecycle of Machine Learning applications with Docker and Jenkins to achieve speed, reliability, versioning and security.

Title: Build and automate your Machine Learning application with docker and Jenkins

Date: Thursday, 22 October 2020

Time: 10:00 PM IST / 12:30 PM EDT

Presenter: Shubham Goyal, Data Scientist

Sometimes, even the smartest among us can feel inept as we fail to figure out which light switch or even burner to turn on, or whether to push, pull, or slide a door. The fault, argues the ingenious - even liberating - audiobook, lies not in ourselves, but in product design that ignores the needs of users and the principles of cognitive psychology. The problems range from frustratingly obvious and hidden controls to arbitrary relationships between controls and actions, exacerbated with a lack of feedback or other assistance and unreasonable demands on

design. Ideas should be communicated, which is why we are coming up with a webinar to explore the universe design principles and apply them to designing technology products.

KNOLDUS INCORPORATIONS is doing WEBINAR for MCA 2021 batch students.

ABOUT COMPANY: Knoldus is a niche software development company focused on Scala, Erlang and Big Data solutions like Spark and Flink. Knoldus is the only Light bend (Type safe) partner in the Asia-Pacific region and one of the biggest promoters of Scala Eco System. Knoldus is the Data bricks (Creator of Certified Systems Integrator as well. For more information logon to <https://www.knoldus.com>.

Flink is an open-source framework for distributed stream and batch processing and represents the next generation of big data computing engines. To achieve elastic scalability, it is typically deployed in clustered environments, and increasingly on top of container orchestration platforms like Kubernetes. However, when it comes to deploying the Flink jobs in production there are various strategies one needs to analyze and configuration with which it needs to play on Kubernetes.

In this meet up to gain insight into our best practices for running Flink on Kubernetes, we will include concepts like When to use sidecar containers, How to checkpoint to external storage and integration with cloud security models. We will conclude the talk with a short demo of how to run a Flink job and session cluster on Kubernetes. You will leave the session with knowledge of how to apply these techniques to your own applications.

Title: Flink Jobs Deployment On Kubernetes

Date: Thursday, 30 September 2020

Report on Online Yoga Competition organized by MERI CSR Club Aaghaz
The Club Aaghaz organised an online contest titled Yoga for Healthy Living in 1 March
The event aimed at inculcating values of healthy life in the pandemic era. Yoga poses a
greater span of life and also has numerous physical and mental benefits. Yoga in our daily
life leads to greater harmony in our thoughts, deeds and actions. The contest also aimed at
encouraging the society to practice yoga. This also gives a chance to all the staff, faculties and
students of the institution to contribute towards the society, environment and ultimately country.
Participants were asked to submit videos practicing Yoga with their family members. This
activity promoted the importance of Yoga among students and society. The Club received
enthusiastic participation from students.

"Big data" becomes increasingly ubiquitous and important to a variety of organizations. Even the existing database systems and platforms have become too cumbersome to set up and maintain. On-site systems can be complex and difficult to scale, and other "big data" systems require constant tuning and administrators with the knowledge on how to do so.

By using your data rather than managing the system your data lives in. Join our upcoming webinar to learn more about Snowflake and how it interacts.

Let's get to know Snowflake

In this webinar, our expert will walk you through Cloud-Based Data Warehousing

Title: Introducing Snowflake: Cloud-Based Data Warehousing

Data Scientists use Time Series analysis to look at historical data, identify patterns, and generate short & long term predictions on how factors that affect your business may change in the future. It is used to make important insight-driven decisions like sales & inventory prediction, decisions around pricing etc. In the most recent and significant use case, time series analysis has been used to create models to predict where COVID-19 cases are expected to reach in a particular region. **KNIME Analytics is a great platform to help you to make time-series analysis work for your business.** It has found its use in multiple industries for data processing, ETL, data visualizations, and analysis. You can easily build time series prediction models with its GUI approach with minimal coding.

In this webinar, our Machine Learning expert will walk you through building models with time series analysis using the KNIME Analytics Platform. Join us if you're looking to make better business decisions

Java web development can get challenging particularly when you need to parse JSON files from the Linux command line. You're probably familiar with operating on JSON formatted data with commonly used programming languages like Python. However, Bash doesn't understand JSON and the usual text manipulation tools like grep, sed, or awk are cumbersome to use. Fortunately, there is a better way of parsing JSON files from the Linux command line. JQ is a lightweight processor which makes it easy to interact with JSON files from the command line or in a bash script while opening up a lot of automation possibilities.

Title: Introduction to JQ

Level: Introductory

Date: Thursday, 21st May 2020

Time: 10.00 PM IST / 11.30 AM EDT

Presenter: Etash Singh, Software Consultant

This webinar is going to introduce you to the concept of JQ and its various applications like-

- How to work with simple filters?
- What are the built-in operators & functions
- How to use conditionals & comparisons?
- How to write user-defined functions?

- How to work with Regex?
- How to use streaming JSON data with JQ?
-

Notice for MCA 3RD year students.

TCS EngiNX (TCS Engineering Innovation Contest)

TCS EngiNX 7.0 is conceived to bring the best out of college grads to contribute to this highly evolved world using multi-disciplinary solutions. EngiNX is challenging you to identify use cases and provide a solution to a real world problem by connecting the 'Sensors & Software' and enable efficient decisions through Engineering Applications to the end user. In the past four editions of TCS EngiNX we have been seeing very promising innovations that solve real world problems and all of them have brought the best innovations that help humanity leveraging the best in latest technologies. Innovation is the essence of engineering and Innovation is all that we engineers do when we put our creative juices at work. Our impactful innovations give the world that small push which sets the gears of change in motion on a global scale. Change of gears is very rapid of late - 'IT OT Convergence' is the order of the day. The Real world of machines is being made to seamlessly speak to IT in real time. "Digital twins" are being used to help manage these machines more efficiently.

In all editions of TCS EngiNX we have been seeing very promising innovations that solve real world problems and all of them have brought the best innovations that help humanity leverage the best in latest technologies.

Team event, with 4 members per team, open to students
MCA 2020 & 2021.

This year's theme is "Digital Eminence - Making Things Smart"

Registration Window: 20th February 2020 to 21st March 2020. (Based on the Inputs received from the larger campus team)

This year top 3 teams will be awarded and each of the top 5 teams in the finals will get a sponsorship of INR 100,000 to develop their prototype.

Total Prize Money of INR 850,000

Winner : 500,000

1st Runner Up : 250,000

2nd Runner Up: 100,000

If you have the right use cases with solutions, we will help you build it.

AN EXCITING OPPORTUNITY FOR ALL THE STUDENTS.

TCS conducts a Global level contest called TCS Codevita on our student portal Campus Commune for BTech/MTech/BSc/MSc/BCA/MCA students. This contest is widely popular among Science Graduate and Engineering students because they give the students opportunities to win Job/ Internship opportunities with TCS along with an excellent learning platform and exciting cash prizes. All these contests and their registrations are free of cost and virtual on our Campus Commune portal for students and previously thousands of students have won provisional offers/ direct interview/internship opportunities through them. MockVita, the practice round for CodeVita Season VI, where brilliant coders participate to match wits with fellow coders and gauge the coding strength. Please note that this practice round will be open only for students who register for CodeVita Season VI

Students can participate in MockVita in a 24 hour window starting at 03:00 PM IST on 06-April-to 07-April-2020 till 03:00 PM IST. To participate log on to <https://nextstep.tcs.com/campus/>

Students do not have to incur any cost to register for TCS National Qualifier Test (NQT).

TCS NQT 2020 Important Dates:

Registration Start Date: 7th June 2019

Registration End Date: 10th July 2019

Hall Ticket Issue Date: 15th July 2019

Online Test: 20th July 2019

Interviews: 25th July Onwards

Pattern for TCS National Qualifier Test: TCS NQT 2020

Sections	No. of Questions	Time in Minutes
English	15	10
Quantitative Aptitude	15	30
Reasoning Logic	10	20
Code	1 Problem Statement	30
Total		90

TCS NQT 2020 Eligibility:

Qualification	Full Time Graduates from B.E / B.Tech / M.E / M.Tech / M.Sc / MCA - 2020 Year of Pass-out.
Eligible Streams from UG/PG	All Engineering Streams.
Eligible Streams from M.Sc	Computer Science & Information Technology and related streams
Criteria	60% throughout Academics in X/XII/UG/Diploma/PG
Backlog Criteria	1 Active Backlog at the time of appearing for the Exam
Gap Criteria	Overall Gap in Academic Career not to exceed 2 years

TCS EngiNX (TCS Engineering Innovation Contest)

TCS EngiNX 7.0 is conceived to bring the best out of college grads to innovate for this highly evolved world using multi-disciplinary solutions. This year EngiNX is challenging you to identify use cases and provide engineering solution to a real world problem by connecting the 'Sensors to the Software' and enable efficient decisions through Engineering Algorithms to the end user. In the past four editions of TCS EngiNX we have been seeing very promising innovations that solve real world problems and all of them have brought the best innovations that help humanity leveraging the best in latest technologies. Innovation is the essence of engineering and Innovation is all that we engineers do when we put our creative juices at work. Our impactful innovations give the world that small push which sets the gears of change in motion on a magnanimous scale. Change of gears is very rapid of late - 'IT OT Convergence' is the order of the day. The Real world of machines is getting ready to seamlessly speak to IT in real time. "Digital twins" are going to help manage these machines more efficiently.

In the past editions of TCS EngiNX we have been seeing very promising innovations that solve real world problems and all of them have brought the best innovations that help humanity leverage the best in latest technologies.

It is a team event, with 4 members per team, open to students from YOP 2020 & 2021.

This edition's theme is "Digital Eminence - Making Things Smart

Registration Window: 18 th February 2019 to 25 th March 2019
Based on the Inputs received from the larger campus teams

This year top 3 teams will be awarded and each of the top 3 teams in the finals will get a sponsorship of INR 100,000 to develop their prototype.

Total Prize Money of INR 850,000
Winner : 500,000
1st Runner Up : 250,000
2nd Runner Up: 100,000

If you have the right use cases with solutions, we will help you build it.
Are You Ready???

Registration Link: <https://on.tcs.com/2NdYGHX>

Last date for Registration is 25th March 2019.
